CEILING LIGHT | 2022

**By its elementary lines, strong and simple, it generates several interpretations; branches for the one, flight of bird for the the other. It questions in this way the status of the object and brings to question the notion of artifact. The broken branch can it become object when the individual decides to see sculpture, suspension or luminary there? The appearance and the consideration made of an object are pointed out. PREMISSE underlines a return to the simple, naive, primitive form and is interested in the rudimentary function of lighting.**

CEILING LIGHT | 2022

**Made from a basic aluminium tube, cut, curved and painted, PREMISSE challenges industrial production in order to bring poetry and sensitivity to the manufactured object. Light sources placed on the edges of the lamp meet where the tube split. Beams extend the shape of the object including it with harmony to the location. Placed alone, in couple or in ballet of strange creatures inviting to the pleasure of lyric contemplation, fixed.**

**We have chosen to use High-End LED ribbon to guarantee a professional quality light.**

**In order to increase the comfort of the user and the adaptability of the product to different spaces, the light is dimmable. For a better light diffusion and a long lasting protection of the ribbon, it is inserted in an aluminium profile that also provides a heat sink to maintain good heat transfer efficiency.**

Elements in constant quantity :

- 1x A1 notice-poster
- 1x ceiling profile high 50X40X40
- 1x ceiling profile low 60X40X60
- 1x DEL driverV

Elements in variable quantity according to the number of lamps bought. / for a lamp :

- 1x DEL strip 50 cm
- 1x aluminum profile
- 1x electric wire 2000mm
- 2x end cap
- 2x self-locking cable tie
- 2x galvanized steel cable clamp
- 2x steel suspension cable 2000mm

LED chip	SMD 2216
Quantity of LED	180 LED/m
Input voltage	24V
Power consumption	12.8 W/m
Luminous flux	1350 lm/m
Luminous efficiency	105 lm/W
Color Redering Index (CRI)	90+
Dimmable	Yes
IP rating	IP20
Light temperature	3000 K

fig.1

This lamp is specially designed for indoor lighting. Its different fixings allow you to arrange it at your convenience.

- 1 Start by installing the upper part of the ceiling light **A** by choosing the correct dowel system according to your surface. Make sure to keep the electricity supply through the hole provided for this purpose located in the centre of the technical box **C**.
- 2 On a flat and safe surface, lay out the different parts for assembly. Start by screwing the self-locking cable ties **B** onto the lower part of the ceiling light **A** (fig.3), planning the desired inclination of the lamp **fig.1**. The cable lies near the power cable must be connected to the technical box. Insert the metal cable **D** into the self-locking cable ties **B**.
- 3 Insert the power cable **E** of the lamp into the lower part of the ceiling light **A** through the hole provided for this purpose located next to the self-locking cable clamp.
- 4 Connect the lamp to the transformer respecting the current direction of the device, as well as phase and neutral **fig.2**. Repeat the operation as many times as you have lamps to hang.
- 5 Connect the transformer **F** to the ceiling power supply by switching off the main power supply first. This step may require two people to hold the unit up.
- 6 Then close the ceiling light making sure that no wires are sticking out or in the way, the black foam patches will help you to centre the part that fits in. Use the coloured dots to match the direction of assembly of the two parts of the ceiling light. Secure the bottom part to the top part at the four fixing points with the supplied set screws **G**.
- 7 Easily adjust the length of the metal cables with the self-locking cable ties **B**. Tips: by pressing the thinner part at the end of the piece, you release the cable if it has become too short.
- 8 Then carefully insert the excess power cable inside the lower part of the ceiling light **A** leaving enough length to fit smoothly along the suspension cable. Be careful not to pull on it as this may damage the internal system.
- 9 Finish by cutting off the excess suspension cable with a wire cutter. Press the switch, strange creatures in aerial ballet inhabit the heights of your interior and invite you to the pleasure of lyrical, frozen contemplation.

 To transformer

Elements in variable quantity according to the number of lamps length  
 Elements for a lamp  
 To aluminium lamp  
 To 70 cm LED strip  
 To aluminium LED profile  
 1200 electrical wire  
 2x end cap  
 2x self-locking cable tie  
 2x galvanised steel cable clamp  
 2x black steel suspension cable

RECYCLING INSTRUCTION: Premisse lamp has been designed entirely with recycling in mind. All parts can be dismantled without any special tools. Please recycle them at the designated collection points. Electrical products should not be disposed of with household waste. Contact your local authority or dealer for recycling information.

SAFETY INSTRUCTIONS: When performing maintenance, make sure that the product is switched off. Remove dust with a microfibre cloth and water.

WARNING: Risk of electric shock. Turn off the circuit breaker on the electrical panel.  
 IMPORTANT: Before installing this product, the user and/or installer must have read and understood these instructions. This appliance must be properly installed before use. If these instructions are not followed, Yvan Caillaud Design Studio will not be held responsible for any problems or malfunctions of the product. Failure to follow the installation and/or use instructions will void the warranty. We recommend that this product be installed by a certified electrician. In some states or provinces, it is legally required that this type of product be installed by a certified electrician in accordance with applicable electrical and building codes.

Warranty: Yvan Caillaud Design Studio cannot be held responsible for any direct or indirect damage caused by the use of the product if the product has been improperly installed or used.

products that are improperly installed or subjected to abnormal use. The product(s) or part(s) may be requested for inspection and verification. Normal wear and tear, misuse, neglect, vandalism, improper maintenance (surface damage due to chemical interaction or cleaning products, including but not limited to metal apron), use of cleaning products containing abrasives, alcohol or other organic solvents, mechanical accident, abuse, fire, flood, theft, natural disaster or modification of the product are not covered by the limited warranty. This warranty does not cover handling, labor, transportation, or any other costs associated with the installation or replacement of the product. The limited warranty is valid only in the country where the purchase was made from authorized dealers. Yvan Caillaud Design Studio shall not be liable for any direct or indirect injury or damage caused by the use of the product if the product has been improperly installed or used.

# why us ?

## Good commercial potential

- **Price aligned with the average of the market**
- **The product allows a great flexibility of installation for the consumer, allowing also to apply to architects for larger projects**
- **3 year warranty is offered**
- **Professional quality DEL (CRI 90+, dimmable, 1350 lm/m, etc.)**
- **Possibility to order custom-made products for a special client (colours/sizes/quantities)**
- **Custom labeled packaging is provided (cardboard box/foam/personalized tape) and designed to be easily stackable.**
- **Added value with the high quality A1 format leaflet poster, offered with the product.**
- **Installation service proposed**
- **The studio is committed to respect delivery deadlines**

# conditions

**Yvan Caillaud Design Studio commits itself to respect the delivery time of 4 to 5 working days within the limit of available stocks. For any particular request (quantity, color, installation) please send an email to [info@yvancaillaud.com](mailto:info@yvancaillaud.com).**
